Wright.

THE PREFACE.

MAny and various are the Books of Interest, some computed for Days, but not the Year throughout, others for Days and Months, &c. The only Book that has occurred to my View, is Mr. Roger Clavel's Tables examined by Mr. John Spicer Printed Anno 1683. without an Error, which was Calculated for the Use of the Exchequer at 6 per Cent, as by Act of Parliament settled in Charles the II'd's Time,) in which Book upon Examination were found many and great Errors, committed both by the Press and otherwise; which if it had been Correct, had been very useful to the Publick, but its now Perfected with many Additions, viz. as the Tables of Compound-Interest, the Amount and Discompt of 100l. and so proportional for a greater or lesser Sum of Money at 3. 4. 5. 6. 7. 8. 9 and 10. per Cent, from one Year to 61 is all New; so the Forbearance and Discompt of Annuities, his Tables being but for 31 Years at 6 per Cent, is here carried further, viz. to 61 Years, and at the several Rates, at 3. 4. 5. 6. 7. 8. 9. and 10. per Cent. Over and above the Tables, you have here general Rules throughout the whole Book for the Working or Examining

The Preface.

*Examining the several Tables, resolving the whole
business of Interest, both Simple and Compound,
with the true Valuation of Free-hold Estates,
the Purchasing of Annuities for Lives, &c. Which
makes the Book the Compleatest of any yet Extant,
the whole Work was wrought in Decimals, and the
Powers carried high, that Truth might appear, as
unto the Hundredth part of Penny in vulgar Num-
bers, as Pounds, Shillings, Pence, and the Hund-
redth part of a Penny: I have taken great Care in
the Correcting the Press, notwithstanding some few
Errata have happened, which will be found at the
End of the Book amended.*

*I conclude referring you to the Perusal of the subse-
quent Computations, praying your favourable accep-
tation of Them, as They were with much Industry and
Pains Calculated for the Publick;*

*From my House
at Camberwel,
Dec. 18. 1710.*

Your

Humble Servant

Tho. Langham.

ERRATA.

In the Tables of Simple Interest.

Days

44	400 l. for 0 d. $\frac{4}{7}$, read 10 d. $\frac{11}{7}$.
141	40 l. for 8 s. read 18 s.
171	2000 l. for 13 s. read 12 s.
185	60 l. for 6 d. read 5 d.
220	30 l. for 0 l. read 1 l.
226	400 l. for 7 s. read 17 s.
242	4000 l. for 15 s. 7 d. 39. read 2 s. 5 d. $\frac{1}{2}$.
244	50 l. for 1 l. 8 s. read 2 l. 0. 1. 31.
398	3 s. for 1 d. read 2 d.

20 Years	2 s. for 1 s. 7 d. 40. read 1 s. 2 d. 40.
Ibid	1 s. for 2 d. 20 read 7 d. 20.

In the Tables of the Amount of 100 l. at 3 per Cent.

40 Years	100 l. for 9 d. read 0 d.
15 Years	100 l. at 10 per Cent. for 416 l. read 417 l.

In the Tables of the present Value for 100 l.

32 Years	100 l. at 6 per Cent. for 19 d. read 10 d.
----------	--

In the Tables of the Forbearance of Annuities.

34 Years	100 l. at 3 per Cent. for 5775 read 5773.
----------	---

In the Table for the Discount of Annuities.

4 Years	100 l. at 9 per Cent. for 321 read 325.
---------	---

A TABLE for the ready finding out the quantity of Days, from one Time prefix'd to another under a Year.

January 31	February 28	March 31	April 30	May 31	June 30	July 31	August 31	September 30	October 31	November 30	December 31
February 59	March 59	April 61	May 61	June 61	July 61	August 62	September 61	October 61	November 61	December 61	January 61
March 90	April 89	May 92	June 91	July 92	August 92	September 92	October 92	November 91	December 92	January 92	February 92
April 120	May 120	June 122	July 122	August 123	September 122	October 123	November 122	December 122	January 123	February 120	March 122
May 151	June 150	July 153	August 153	September 153	October 153	November 153	December 153	January 153	February 151	March 151	April 151
June 181	July 181	August 184	September 183	October 184	November 183	December 184	January 184	February 181	March 182	April 181	May 182
July 212	August 212	September 214	October 214	November 214	December 214	January 215	February 212	March 212	April 212	May 212	June 212
August 243	September 242	October 245	November 244	December 245	January 245	February 243	March 243	April 242	May 243	June 242	July 243
September 273	October 273	November 275	December 273	January 276	February 273	March 274	April 273	May 273	June 273	July 273	August 274
October 304	November 303	December 306	January 306	February 304	March 304	April 304	May 303	June 303	July 304	August 304	September 304
November 334	December 334	January 337	February 334	March 335	April 334	May 335	June 334	July 334	August 335	September 334	October 335
December 365	January 365	February 365	March 365	April 365	May 365	June 365	July 365	August 365	September 365	October 365	November 365

The Use of the preceding Table.

By the Table preceding you may find out the exact number of Days, from one Time prefix'd to another und a Year. Thus;

Question.

I would know the exact number of Days from the 20th March to the 17th of November.

Answer.

In the highest Column find the Column mark'd *March*, descending down to *November*, which done, take the Number next above it; to which add the 17 Days of *November*, and from that Total, subtract the 20 Days of *March*, and the remainder is the number of Days desired.

Example.

The next Number above *November* is ——— 245
Add the Days of *November* ——— 17

Total ——— 262

The Days of *March* subtract ——— 20

The Number of Days desired ——— 242

Instructions for the Use of the following Tables of Simple Interest.

THE Column next under the Title hath the Number of Days for Interest; the Column next beneath it hath *s. d.* 100 parts of a Penny; in the Column just under it ascending ——— The first Column to the Left and hath the Principal set down from 10000 *l.* to 1 *s.* with Principal Pounds just over it; the next four Columns (even against each Sum have the *l. s. d.* and the foresaid Fractions, being the Interest answering to it in the first Column each day for Interest) So far for the form of the Tables:
The Use of them in the Resolutions of Questions: When you have two, three, or more of them to be added together, add them as a whole Number, and as many Tens as you carry from the last place next your Left Hand, add them to the Pence as so many Pence, and for the Fractions that remain, you may know the Value by these three Numbers.

$\left. \begin{array}{l} 75 \\ 50 \\ 25 \end{array} \right\}$ equal to $\left\{ \begin{array}{l} \frac{3}{4} \text{ or Three Farthings.} \\ \frac{1}{2} \text{ or Two Farthings.} \\ \frac{1}{4} \text{ or One Farthing.} \end{array} \right.$

Question the First

I would know the Interest of 172 *l.* 10 *s.* for 159 Days.
First seek for the Number of Days, and against 159 Days you will find the several Sums following; viz.

100	2	12	3	28
75	1	16	7	10
2	0	1	0	54
Sh. 10	0	0	3	13

172 *l.* 10 *s.* 4-10-2-05

which is Four Pounds Ten Shillings Two Pence $\frac{1}{4}$ of a Penny, or $\frac{1}{4}$.

Supposing the same Sum of 172 *l.* 10 *s.* you would know the Interest at 8 per Cent.

At 6 per Cent. it is $\frac{4}{10} - \frac{2}{10} = \frac{2}{10}$
 Add the $\frac{2}{10}$ to $\frac{2}{10}$ = $\frac{4}{10}$

Which added then it is $6-00-2-73$
 which is the Interest at 8 per Cent. If it were at 5 per Cent.
 Subtract the $\frac{2}{10}$ at $4-10-2-05$
 The $\frac{2}{10}$ = $0-15-0-34$

The Interest at 5 per Cent. is $3-15-1-71$
 And so for 4 per Cent. Subtract the $\frac{2}{10}$ and so on at pleasure
 the Tables being carried on from Day to Day successively
 and the Fraction to the $\frac{1}{10}$ part of a Penny, there will no
 thing worth taking notice of be lost, and so serves very True
 and Easily for any Rate of Interest. I have carried the
 Table to 16 Years and $\frac{2}{3}$, which Time exactly doubles the
 Sum: For the Law allows of no more Interest than the Prin-
 cipal doubled.

The Interest of 129 l. for 16 Years and $\frac{2}{3}$, you will find in
 the Table Intitled 16 Years and $\frac{2}{3}$ stand thus; viz.

For l. 100 ——— 100
 For 20 ——— 20
 For 9 ——— 9

The Interest of 129 for 15 Years is thus;

l. 100 ——— 90
 20 ——— 18
 9 ——— 8-2 s.
 8 ——— 4
 129 ——— l. 116-2 s.

Now if it were required what the Interest of 129 l. for 15
 Years is at 5 per Cent. it is thus:

129 l. 15 Years at 6 per Cent. — l. 116-02-9
 At 5 per Cent. the $\frac{2}{10}$ subtract — 19-07-9
 129 l. at 5 per Cent. is — l. 96-15-0
 Again

Again, 129 l. 15 Years at 6 per Cent. $\frac{1}{2}$ is 135-09-0

At 7 per Cent. add the $\frac{1}{2}$ 135-09-0

129 l. at 7 per Cent. is 135-09-0

129 l. at 5 per Cent. is 135-15-0

The $\frac{1}{2}$ of 135 l. 2 s. add 135-15-0

135-15-0

So any Sums may be proved for 135 l. 14 s. is the $\frac{1}{2}$ of 16 l. 2 s. which was at 6 per Cent. and the $\frac{1}{2}$ of that is 2 per Cent. Now 2 per Cent. more 5 per Cent. is equal to 7 per Cent. As you find 5 per Cent. is 135-15-0

And 2 per Cent. 135-14-0

135-09-0

Which proves that 129 l. for 15 Years at 7 per Cent. which at 6 per Cent. adding $\frac{1}{2}$, is equal to 5 adding 2 per Cent. and so any other Sums may be done with a great deal of Pleasure when it is conceiv'd, which is very well understood by most; but for the sake of them that know not the Variations there is in Numbers, for their sakes only have I shew'd them the way of changing the Rates of Interest as they may have occasion. As 6 per Cent. being Lawful Interest, the Table is Calculated at large at 6 per Cent. from which any other Rate is easily done, by adding or subtracting. In all Questions of Interest there is four parts in the Question:

- Viz. { The Principal, or Sum put to Interest.
The Time of its continuing at Interest.
The Ratio of the Rate of Interest per Cent.
The Amount of the Principal and its Interest.

Any three of these Parts being given, the other may be found by help of this General Theorem.

The Time, Rate, Principal, more Principal equals the Amount.

This Theorem admits of four Varieties of Questions. As for Example.

1. If Principal, Time, and Rate, are given, find the Amount.

Again

This Question is the most general in use of any that happens in the whole business of Simple Interest.

o 20-7-11 ————— **R U L E** ————— 11-1-11

Multiply the Principal, the Time, and the Rate, all three together, and their Product will be the Interest; to which add the Principal, and the Sum will be the Amount.

E X A M P L E

In the former Question, What Sum will 120 £ . amount to in 15 Years at the Rate of 6 per Cent. per Annum? Here is given the Principal 120 £ . the Time 15 Years, and the Rate 6 per Cent. to find the Amount: Which by the Rule is done thus:

First the Principal ——— 120 £ .
 Multiply by the Time — 15 Years
 —————
 Multiply by the Rate — 6
 —————
 The Product ——— 1080 £ . That is 108 £ . 2 s.
 is the Interest of 120 £ . for 15 Years: Then 108 £ . 2 s. more
 120 £ . equals 245 £ . 2 s. the Amount.

2. When the Amount, Time, and Rate are given, to find the Principal.

R U L E

Multiply the Time with the Rate, and to their Product add 1, then divide the proposed Amount by that Sum, and the Quotient will shew the Principal required.

E X A M P L E

What Principal, or Sum of Money being put to Interest for 15 Years, will amount to 245 £ . 2 s. at 6 per Cent. Or thus: Suppose a Debt of 245 £ . 2 s. were not to be Paid until 15 Years hence, what must be Paid in ready Money, the Creditor allowing 6 per Cent. Discount?

In

In this Question is given the Amount 245 l. 2 s. the Time 15 Years, and the Rate 6 per Cent. to find the Principal. Thus, the Time 15 Y. 1500 245 l. the Dividend Multiply by the Rate 6

551

1710

More 1, add — 1,

1710

Equal — 1,90 the Divisor

0000

The Principal you see is 129 l. 2 s. 3. Suppose the Principal, Time, and Amount, were given to find the Rate. Having any Principal Sum, with the Time of its being at Interest, and the Sum is proposed to amount to in that Time given, then to find the Rate of Interest per Cent.

R U L E.

Divide by the Product of the Principal, multiplied into the Time, the difference between the proposed Amount and the Principal, the Quotient will shew the Rate of Interest.

E X A M P L E.

At what Rate of Interest will 129 l. amount to 245 l. in 15 Years time?

Here is given the Principal 129 l. Time 15 Years, and the Amount 245 l. 2 s. to find the Rate. Thus, 245 l. 2 s. less 129 l. is equal to 116 l. 2 s. the Difference or Dividend, and 129 l. multiplyed by 15, is equal to 1935 the Divisor. See the Operation.

Divisor 1935 116.10 (of the Rate

000,00

4. Having Principal, Rate, and Amount given, to find the Time in which any given Principal will amount to.

R U L E.

RULE. Divide by the Product of the Principal, multiplied into the Rate, the Difference between the proposed Amount and the Principal, and the Quotient shall be the time.

EXAMPLE.

In what time will 129 l. amount to 245 l. 2 s. at 6 per Cent. per Annum?

In this Question is given the Principal 129 l. Rate 6 per Cent. and the Amount 245 l. 2 s. to find the Time; which is thus: First, 245 l. 2 s. less 129 l. equals 116 l. 2 s. the Dividend, and 129 l. Principal, multiplied by 6 the Rate, equals 7,74 for the Divisor.

By 7,74) 116,10 (15 Years, the Time required.

3870

0000

These Four Examples, with the Rules by which they are performed (if well understood) are sufficient. There is but one Question varied four several ways, to shew how any Question in the like nature may be resolved at any proposed Rate of Simple Interest for any Time of whole Years.

Simple

Simple Interest at 6 per Cent.

Rebate or Discompt of Money. Simple Interest.

AT a rate Assigned, is grounded upon this Reason; That he who receives his Money upon Rebate, ought to receive just so much ready Money, which being put out at Interest at the same Rate, and for the same Time will amount unto the same Sum. To find the Rebate or Discompt of any proposed Sum, and the true Equatation of several Payments, Observe;

First, The Sum proposed to be Discompted for.

Secondly, The Time it becomes Due.

Thirdly, The Rate of Interest per Cent.

Fourthly, The Discompt or Rebate sought.

From hence ariseth this General Theorem.

Time, Rate, and the Sum proposed to be Discompted for, divided by the Time, Rate, more 1 will be Equal to the Discompt or Rebate sought.

R U L E, Multiply the given Time with the Rate of Interest, and to their product add 1, that Sum will be the Divisor, then Multiply the first Product and the Sum that is to be Discompted for, that Product will be the Dividend, and the Quotient will be the Discompt required.

Example.

If 300 l. be due at the end of 3 Years, what ready Money will satisfy the said Debt, at 6 per Cent, per Annum?

Here is given the Sum l. 300, Time three Years, and Rate 6 per Cent, to find the Discompt,

3. Years.

6. The Rate Multiply.

— 18

More 1, add 1.

— 19, 18 The Divisor.

Then the first Product 18.

The

The Sum to be Discounted 7. 300 Multiplied together 7. 3400 the Dividend, and 1, 18 the Divisor the Quotient is 45, 762703 which is 45 l. 13 s. 3 d. $\frac{1}{2}$ the Discount sought for. Which subtract from 300 l. the remainder is 254 l. 4 s. 8 d. $\frac{1}{2}$ which agrees with the Tables as you will find under the Title of 36 Months. But if you would have the exact Sum at once (without Subtraction), then work by this General Rule: Multiply the Rate and the Time together to that product add 1, which will be the Divisor, and the Sum proposed to be Discounted for will be the Dividend.

Example.

If 300 l. be due three Years hence, what ready Money will pay the Debt,

The Rate 6 per Cent.
 3 the Time, 3 Y. Mul.
 18
 (1, 18,) 300 l. the Divid. 1, More 1. add.
 254, 237288 1, 18 the Divisor.

Which is 254 l. 4 s. 8 d. $\frac{1}{2}$. Which agrees exactly with the Tables. Which Sum, viz. 254 l. 4 s. 8 d. $\frac{1}{2}$ ready Money will pay a Debt of 300 l. due three Years hence.

Now to demonstrate this Clearly, make this Sum, viz. 254 l. 4 s. 8 d. $\frac{1}{2}$ Principal, and take 6 per Cent Interest Work, as by the former Rule, thus the Principal 254, 237288 x by the Time 3 Years = 762712866. Then by the Rate 0, 06 = 45, 762712 which added to the Principal 254, 237288 = 300 l. Just, or thus in a Vulgar.

254	237288	3	762712866
254	237288	06	45762712
			762712866
			300000000

254. 4. 9 d. Make it full 9 Pence.
 3 Multiply by the Time 3 Years.

Ans. 14. 3

6 then by the Rate.

25. 76. 3. 6

254. 4. 9 Principal.

44. 15. 3 Interest.

25. 25

L. 300. 0. 0.

3. 06

100

So any Sum of Money at any Rate, for any Time, may be performed either way. I have shew'd you the Way to work any Question at any Rate, because these Tables are only Calculated at 6 per Cent, being most in Use, and lawful Interest. The Use of the following Tables.

Question (1)

A. Buys of B. certain Commodities amounting unto 1215 L. for which B. agrees to be paid at 3 four Months. A. Willing to satisfy B. presently. He Discompting at the Rate at 6 per Cent, per Annum, desires to know what Money he must Pay.

Answer.

Because B. is to be Paid at 3 Payments, take the $\frac{1}{4}$ of the Principal, viz. 1215 L. for four Months $\frac{1}{2}$ for eight Months, and $\frac{1}{4}$ for twelve Months, look in the Table for four Months.

First the $\frac{1}{4}$ of 1215 L. is (405) 400. is 392. 2. 1. 64

4 Months 405. 397. 11. 21. 11

Again for 8 Months 400. 384. 12. 3. 69

405. 389. 8. 5. 13

Again for 12 Months 400. 377. 7. 02. 03

405. 382. 1. 61. 10

By which Operations, I find that L. 1168. 11. 1. $\frac{1}{4}$ will Pay L. 1215. If it be paid presently, and so much Money must A. Pay.

1215. 1168. 11. 1. 74

Question

Question (2)

A. Is indebted to B. 120*l*. to be paid at 3 several Payments, viz. 100*l*. at the end of 9 Months, 150*l*. at the end of one Year and a half, and 170*l*. at the end of 2 Years and three quarters; the Question is what B. ought to Rebate or Discount, at 6 per Cent, per Annum, Simple Interest, to have his whole Debt paid presently.

Answer, Look in the Tables of Discount.

First, 100 <i>l</i> . for 9 M. you will find	100	is	95.	13.	10.	50
Then 150 for 18 Months —————	100	is	91.	14.	10.	35
Then 170 for 33 Months —————	200	is	171.	13.	5.	78
	70	is	66.	01.	8.	60

Which A. is to Pay B. presently 852*l*. 46*5*. 01. 4. 34

The Tables are carried but to three Years or 36 Months, being designed only for Trade, I have put this Question for Years and Parts, which is something difficult to Work by the Rule which is thus, first 75 or $\frac{3}{4}$ of a Year Multiplied by the Rate 0, 06 is equal to 1, 045 the Divisor, and 100*l*. the Dividend, the Quotient is 95, 69378; then 2 Years and half or 1, 5 Multiplied by the Rate 0, 06 is Equal to 1, 09 the Divisor, and 150*l*. the Dividend, the Quotient is 137, 61468.

Then for 2 Years and three Quarters, or 2, 75 Multiplied by the Rate 0, 06 is Equal to 1, 165 the Divisor, and 170*l*. the Dividend, the Quotient is 231, 759656.

The second Quotient is 137, 614680

The first Quotient is 95, 693780

$$\begin{array}{r} 137,614680 \\ + 95,693780 \\ \hline 465,668116 \end{array}$$

Which is 465*l*. 1*5*. 4*d*. $\frac{1}{4}$. which proves the Rule, and the Tables truly agreeing and very Exact, and so for any Rate of Discount, and any Time assigned for Years, and Parts.

Rebate

Rebate at 6 per Cent, Simple Interest.

The Amount of 100 l. Compound-Interest, from one Year to sixty one Years, at several Rates.

Compound-Interest; or Money let out at Interest upon Interest, is that which is produced from any Principal, and its Interest put together; as the Interest of that Principal becomes due, there is created a New Principal by the increase of the growing Interest, therefore it is called Compound-Interest, which is grounded upon a continued Geometrical Proportion; as 100 l. for one Year at 6 per Cent, is 106 l. Multiplied by 1,06, which gives 6 l. Interest for one Year, that is 106 l. you are to receive at the Years End, then 106 Multiplied by 1,06 makes 112 l. 7 s. 2 d. $\frac{2}{3}$ for the second Year, the last Sum Multiplied by 1,06 will produce 119 l. 2 s. 0 d. $\frac{4}{3}$ for 3 Years, and so on, ad Infinitum, or for as many Years as you please, and so at 5, 7, 8, or what Rate of Interest you have Occasion for, tho' the Law does not allow of Compound-Interest, for Money let out, yet in purchasing of Annuities, &c. and taking Leases in Reversion, Compound-Interest ought to be considered and Allowed to the Purchaser for his ready Money. The Amount of 1 l. for one Year at any given Rate of Interest per Cent, may be found by this Equation. As 100 l. is to 106 l. So is 1 l. to 1,06, the Amount of 1 l. at 6 per Cent, or 100. is to 105. so is 1 l. to 1,05 the Amount of 1 l. at 5 per Cent, and so for any given Rate of Interest. Now for the Use of the Tables.

Question (1.)

What will 129 l. Amount unto in 15 Years at 6 per Cent per Annum, Compound-Interest.

Answer.

Look in the Table for 15 Years on the Top, and in the Margent for 100 l. and against it you will find

Then take the $\frac{1}{2}$ Then for

Which added together makes 129. 309. 3. 1. 43 309 l. 3 s. 1 d. $\frac{1}{2}$. The Amount of 129 l. for 15 Years.

The Amount of one Hundred Pounds for sixty
 one Years, at the Rates of 3. 4. 5. 6. 7. 8. 9.
 10. Pounds per Cent Compound-Interest, and
 so proportional for a greater or lesser Sum of
 Money.

The present Value or Discompt of 100 Pounds Compound-Interest at several Rates, for 61 Years.

AS Compound-Interest, or Money lett out at Interest upon Interest, is grounded upon a continued *Geometrical* Proportion, by Multiplying any Sum by the Rate add 1, so Discompt is a continued Dividing by the Rate add 1, as 100*l.* divided by 1, 06, the Quotient is the Discompt, or neat Money Due (the Discompt taken out) is 94*l.* 6*s.* 9*d.* $\frac{4}{11}$, which is for one Year: This Sum divided by 1, 06 is 88*l.* 19*s.* 11*d.* $\frac{4}{11}$, is for two Years, and so on, *ad infinitum*. The Use of the following Table.

Question (1)

If 120*l.* be Due 15 Years hence, what Money will pay it presently, allowing 6 per Cent Compound-Interest.

Answer.

Look in the Table of the present Value or Discompt of Money for 15 Years, and against 100*l.* you will find it thus,

<i>l.</i>	<i>s.</i>	<i>d.</i>	<i>100</i>
15 Years	100.	41.	14. 6. 36
Then 20 <i>l.</i> is the $\frac{1}{5}$ of 100.	8.	6.	10. 87
	50.	1.	5. 23

Question (2)

Suppose this Sum of 120*l.* were to be Discompted for 15 Years at 7 per Cent, look for the Collum of 7 per Cent, and against 100*l.* for 15 Years, you will find

<i>l.</i>	<i>s.</i>	<i>d.</i>	<i>100</i>
	36.	4.	10. 71
Then the $\frac{1}{5}$ is	7.	4.	11. 74

43. 9. 10. 45 The Money that is to be paid presently, and so for any Sum of Money at any Rate, for 100*l.* from which Sum any other may be easier found, by adding or taking from as the Question requires, then by Multiplying one Pound into the Sum required.

The present Value of one Hundred Pounds for
 sixty one Years, at the Rates of 3. 4. 5. 6. 7. 8.
 9. 10. Pounds per Cent Compound-Interest, and
 so proportional for a greater or lesser Sum of
 Money.

The Use of the Preceding Tables, viz.

Annuities, Pension, or yearly Rents, being Forborn or Discompted, from one Year to 61 Years, at several Rates of Compound-Interest.

Question (1.)

If 356 l. Annuity or yearly Rent were forborn or unpaid nine Years; what would the Sum of all those Arrears amount to at 6 per Cent?

Answer.

Look in the Tables of the Forbearance of Annuities for nine Years, and against each respective Sum set them down thus.

9 Years for 300.	is	3447	7	10	79
50.	is	574	11	33	79
6.	is	68	18	11	49

Being the Sum of all 356. 4090. 18. 2. 03 the Arrears.

Suppose the same Sum, viz. 356 l. Annuity, &c. were forborn nine Years, what would the Sum of all those Arrears amount to at 6 per Cent Simple Interest? As there is no Tables now Extant as I know of Calculated for the Forbearance of Annuities, &c. at Simple Interest, therefore observe this General Rule, Multiply the Time, by the Time less 1, and half the Rate of Interest together, and to their Product add the Time, then Multiply the Annuity with that Sum, and the Product will shew the Arrears required. First, nine Years Multiplied by 8 is 72, then Multiplied by half the Rate, viz. 3, is 216, to the Product add the Time 9 Years

9	8	72	
72	3	216	
216	9	1971	19
1971	19	2	40 Simple Interest
2	40	3147	18
3147	18	11	63 Difference.
11	63	4090	18
4090	18	2	03 Comp. Interest.

To find the present worth of Annuities, Pension, or Leases at Compound-Interest.

Suppose a Lease of a 50^{l.} per Annum were to be Lett for 21 Years, what may the present Worth of that Lease be, at the Rate of 5 per Cent?

Answer.

Look in the Tables for Discount of Annuities for the Column 5 per Cent for 21 Years, and against 100^{l.} you will find it thus,

100	21 Years is	1282.	2.	3.	67
100	_____	1282.	2.	3.	67

Then 50 is the $\frac{1}{2}$ 50 _____ 641. 1. 1. 83

That is 3205^{l.} 5 s. 9 d. $\frac{1}{2}$ is the present Worth of such a Lease, supposing the Rents be paid Yearly, but if paid at half yearly Rents, then it will Amount to 3244 5 9.

Question (2.)

There is a Lease of certain Lands worth 182^{l.} per Annum, 8 Years to come, and the Lesse willing to take a Lease in Reversion for 21 Years, to begin when the old Lease is Expired; what Sum of Money must he pay for this Lease in Reversion at the Rate of 6 per Cent per Annum Compound-Interest?

Answer.

First, Find out what 182^{l.} per Annum is worth for 8 Years. Look in the Tables of Discount of Annuity for 6 per Cent for 8 Years, you will find it thus,

100.	8 Years is	620.	19.	7.	05	} Then add 8 Years to 21 which is 29 Years, then see what 182 ^{l.} per Annum Annuity is worth for 29 Years at 6 per Cent.
80.	_____	496.	15.	8.	04	
2.	_____	12.	8.	4.	70	
182.	_____	1130.	3.	7.	79	

Look in the Tables of Discount of Annuities for 29 Years, you will find it thus,

100^{l.}

$$\begin{array}{r} 100. 19 \text{ Years } 3. 13. 50. \\ 80. \text{ --- } 1087. 3. 13. 50. \\ 2. \text{ --- } 27. 3. 7. 54. \\ \hline 282. \text{ is } 2473. 10. 2. 68. \\ \text{The former Sum Subtract} \\ 1130. 3. 7. 79. \\ \hline \text{The Lease in Reversion is } 1343. 6. 6. 89. \\ \text{worth } 1343. 6. 6. 89. \end{array}$$

Question (3.)

A. Hath a Lease of 43 *l.* per Annum for 19 Years. B. Hath a Lease of 27 *l.* 10 *s.* for 30 Years, they being willing to change their Leases and pay the Difference of the Price: The Question is, which Lease is the Better, and what one ought to give the other for the Change at 6 per Cent Compound-Interest. First, For A's Lease look in the Tables of Discompt of Annuities thus,

$$\begin{array}{r} \text{A.) } 40 \text{ per Annum for 19 Years is } 446. 6. 1. 12. \\ 3. \text{ --- } 33. 9. 18. 89. \\ \hline 43 \text{ per Annum is } 479. 15. 11. 76. \\ \hline \text{B.) } 20 \text{ per Annum for 30 Years is } 273. 9. 11. 18. \\ 7. \text{ --- } 96. 7. 0. 93. \\ 10 \text{ s. --- } 6. 17. 7. 70. \\ \hline 27 \text{ l. } 10 \text{ s. per Annum is } 378. 10. 7. 58. \end{array}$$

A's Lease is Worth 479. 15. 11. 76
 B's Lease is Worth 378. 10. 7. 88

101. 5. 3. 88 which B. is to pay to A upon the Exchange.

Question (4.)

A. Hath a Lease of Lands to be Lett for 25 Years, for which there is a Fine of 200 *l.* to be paid, and 40 *l.* per Annum Rent, B. being willing to pay less Rent, viz. 25 *l.*

to give a greater Fine; *Query*, what Fine ought to be paid to bring the Rent to 25 *l.* per Annum at 6 per Cent Compound Interest?

Answer.

See what 25 *l.* per Annum is Worth in ready Money for 15 Years, which add to the former Fine, that Sum will be the Fine that ought to be paid. Look in the Table of the Discount of Annuities for 15 Years.

	l.	s.	d.	100
20 is 194	4	10	80	
5 —	48	11	2	70
25 is 242	16	1	50	
The former Fine add	200	0	0	00
The Fine is now become	442	16	1	50

To bring the Rent from 40 *l.* to 25 *l.* per Annum.

Of purchasing Free-hold, or Real Estates.

All Free-hold or Real Estates are Purchased or Bought for ever; therefore the Computing the true Value of such Estates is grounded upon a Geometrical, continually Decreasing.

The Annual Rent of any Free-hold Estate being known, and what its Worth in ready Money, allowing the Rate of any given Rate of Interest for Cent.

The proposed Rent be the Rate of Interest for Cent, the Quotient will be the Value of the Estate at that Rate of Interest.

Example.

A Free-hold Estate of 250 *l.* yearly Rent, how much is it Worth, allowing the Buyer 6 per Cent Compound Interest for his ready Money? Thus the Divisor is 0,06 the Divisor, and 250 *l.* the Dividend, the Quotient will shew the Value of the Estate.

The Operation,

0,06)

10, 06) 250, 00 (4166, 666 which is 4166

30 (The true Value of that Estate

40
48

So Divide 1001. by 0, 06) 100, 00 (1666, 666 which is 1666l. 13s. 4d.

40

If you Try any Rate of Interest, I mean Compound-Interest: You will find

For 3 per Cent 1001. is 3333. 6. 8. or 33 Yr. & 4 Paces

4 100 2500. 0. 0. or 25 Years.

5 100 2000. 0. 0. or 20 Years.

6 100 1666. 13. 4. or 16 Years and 3 Paces.

7 100 1428. 11. 9. or 14 Years and 3 Paces.

8 100 1250. 0. 0. or 12 Years and 3 Paces.

9 100 1111. 2. 2. or 11 Years and 3 Paces.

10 100 1000. 0. 0. or 10 Years

So any Sum divided by the Rate less 1, the Quotient will be the true Value of that Estate for yearly Payments.

How to Estimate the Value of Annuities, or Leases for Lives.

Annuities or leasing of Leases for Lives, is only by an imaginary Valuation grounded upon Custom, and not upon any Consideration that is had to the Age of the Persons whose Lives are to be incurred in the Lease. There can be no true Valuation given: because the Lives of all Mankind are uncertain; but there is a proportional Likelihood of the length of Mens Lives, according to their different degrees of Age, as the ingenious Mr. John Ward in his *Clavis Usurae*, pag. 107, makes the Age of 16 to be the Age, for whole Life a Lease is the most Valuable, as you may see by the following Table.

Ages	Years Purch.	Ages	Years Purch.
1	—2. 50	41	—5. 62
6	—5. 51	46	—5. 31
11	—7. 46	51	—5. 04
16	—9. 00	56	—4. 81
21	—7. 85	61	—4. 60
26	—7. 20	66	—4. 43
31	—6. 46	71	—4. 27
36	—6. 09		

This Table shews the Value of every 5 Years of any single Life, from the Birth to 71 years Old.

An Annuity or Lease of 100 *l.* per Annum, is by this Table worth 600 *l.* for the Life of one that is about 16 years Old; and 'tis worth but 600 *l.* for the Life of one of 36 years Old; and but 250 *l.* for the Life of a Child of a year Old, and so on for any other proposed Annuity or Lease, and Age of the Person for whole Life it is to be Purchased.

The Price of Insurance upon Lives ought to be Regulated, and the Difference between the Price of Insuring the Life of a Man of 20, and one of 50 years Old.

On these Proportions depends the Valuation of Annuities for Lives.
